Understanding how the oceans influence our lives may help us to understand how important is to protect the Ocean.

Ocean literacy education is essential for a common comprehension of how the Ocean is important in the human lives, work and survival and how making informed and responsible decisions protects the Ocean and its resources.

The [Water World Adventure](#) is an interactive eBook that teaches Ocean related topics to children. Illustrations, the story and the learning goals are all aligned to achieve a wider long-term impact with children and nurture a positive relationship between Global Citizens and the Ocean.

This project is co-funded by the European Commission under the programme Erasmus+. For more information and access to the project results, please visit our website in www.waterworldadventure.eu
